

Accounting & Operations | File Review – Data Analytics

Situation

In response to both the data needs of CECL reporting and post conversion clean-up, a large regional commercial bank needed to perform a review of approximately 10,000 collateral files to edit system data record.

Solution

SolomonEdwards brought in a team of collateral experts to review imaged files, locate missing documents and update system records.

Results

This project is ongoing. In the first 4 weeks of the project, SolomonEdwards has reviewed and updated system data records on approximately 1,000 files.
